

**APPENDIX**

**IN THE CLAIMS:**

Please amend the claims as follows:

13. (Amended) A job execution control apparatus capable of executing a plurality of jobs in a parallel manner, comprising:

display means provided with a touch panel function, for displaying information related to one job that is being executed;

means for displaying a button for instructing a stop of the one job on the display means;

means for stopping the one job when a touch operation is carried out with respect to the displayed button;

a predetermined key provided on a portion except for the display means;

means for storing a condition of a job which is directed to a pausing job; and

means for making the job which satisfies the condition pause when the predetermined key is operated.
